

RANDALL ROUSE Randall.g.Rouse@gmail.com | [LI](#) | (720) 930-1314

EDUCATION

- D.O.L CERTIFICATE | SOFTWARE ENGINEERING APPRENTICESHIP | IBM | 2022
- BA BIOLOGY | METROPOLITAN STATE UNIVERSITY OF DENVER | 2019

WORK HISTORY

IBM | SAN JOSE, CA

SOFTWARE ENGINEER – COGNOS ANALYTICS AI INTEGRATION TEAM | 2026 – PRESENT

- Developed AI agents within a supervised multi-agent orchestration framework to support analytics and modeling workflows in IBM Cognos Analytics.
- Designed prompts, tool definitions, and execution flows enabling LLM-driven agents to interact with enterprise analytics services and backend APIs.
- Built integrations between conversational AI interfaces and traditional application workflows, allowing users to perform modeling operations through natural language interactions.
- Implemented agent tooling and API interfaces for calculation generation, metadata retrieval, validation, and analytics-related actions.
- Collaborated across frontend and backend teams to connect agentic workflows with existing enterprise UI and service architectures.
- Developed evaluation and testing processes to compare model performance, measure output quality, and improve reliability of AI-generated calculations.
- Worked with vector search, semantic retrieval, and structured tool-calling patterns to improve agent accuracy and task completion.

SOFTWARE ENGINEER COGNOS ANALYTICS MOBILE | 08/2022 TO 2026 | SAN JOSE, CA.

- Developed and maintained cross-platform mobile applications using React Native, React, JavaScript, and TypeScript for iOS and Android.
- Architected scalable MobX state management and asynchronous application workflows for complex mobile applications.
- Led DevOps and CI/CD improvements using Jenkins, containerized environments, and automated mobile release pipelines.
- Served as the subject matter expert for mobile release engineering, coordinating versioning, builds, and deployments across iOS and Android.
- Led open-source security and compliance initiatives, including CVE remediation, dependency auditing, and automated OSS license reporting.
- Diagnosed and resolved complex cross-platform issues involving WebViews, native modules, and mobile performance optimization.
- Designed and implemented RESTful API integrations using modern asynchronous programming patterns.
- Contributed patches to open-source libraries to support framework migrations and dependency upgrades.
- Mentored engineers and interns on React Native architecture, debugging, and engineering best practices.
- Partnered closely with product managers and designers to deliver high-quality mobile features on aggressive release schedules.

SOFTWARE ENGINEERING APPRENTICE 01/2022 TO 08/2022 | LOWELL, MA.

- Successfully integrated into a team of ten on an enterprise scaled app while completing 12 hours of coursework per week for IBMs apprenticeship program.
- Wrote reusable and efficient code components using React Native and MobX best practices.
- Implemented test-driven development practices to produce clean and maintainable code.

UNITED STATES FISH AND WILDLIFE SERVICE

WILDLAND FIREFIGHTER | 03/2021 TO 11/2021 | DENVER, CO.

- Performed direct wildfire suppression including handline construction, hose lays, mop-up, and structure protection in active fire environments.
- Executed fuel reduction operations using chainsaws and hand tools to cut line, clear brush, and reduce hazardous fuels.
- Participated in prescribed burns, handling ignition (drip torch) and holding operations to maintain fire within control lines.
- Conducted patrol and mop-up to locate and extinguish hotspots, ensuring full containment of fire areas.
- Operated and maintained pumps, engines, chainsaws, and hand tools under field conditions.
- Worked in steep, rugged terrain for extended shifts (12–16+ hours) under variable and extreme weather conditions.
- Followed ICS protocols and coordinated with multi-agency crews on active incidents.
- Maintained situational awareness and adhered to LCES (Lookouts, Communications, Escape Routes, Safety Zones) at all times.

OCCIDENTAL

BARTENDER | 10/2018 TO 05/2021 | DENVER, CO.

- Delivered attentive service in a fast-paced, high-volume environment while maintaining accuracy and composure under pressure.
- Built strong customer relationships through clear communication, hospitality, and personalized service.
- Managed inventory, restocking, and organization to ensure efficient operations and product availability.
- Handled cash transactions and balanced drawers with a high degree of accuracy and accountability.
- Collaborated with team members to maintain smooth operations during peak service periods.
- Developed extensive knowledge of beer, wine, spirits, and craft cocktails, contributing seasonal cocktail ideas to the menu.
- Maintained clean, organized workspaces while adhering to health and safety standards.

INTERSHIPS AND VOLUNTEER WORK

FILIDAE CONSERVATION FUND

FIELD TECHNICIAN | 2025 – PRESENT | | SAN FRANCISCO BAY AREA

- Support wildlife biologists in field data collection and GPS tracking of mountain lion movements and habitat use.

COMMUNITY COLLEGE OF DENVER & RIO MORA WILDLIFE REFUGE

TEACHER'S ASSISTANT & RESEARCH CONTRIBUTOR | 05/2018 – 08/2018 | DENVER, CO

- Worked closely with the Denver Zoo and USFWS in restoring ecological functions at Rio Mora Wildlife Refuge.
- Conducted invasive species removal, native seed collection, and water quality testing to assess environmental health.
- Designed and implemented vegetation management projects, including constructing rock dams for erosion control.
- Calculated grazing potential for a bison herd to ensure sustainable land use.
- Led educational outreach efforts to present research findings to middle school teachers and conservation professionals.

UNIVERSITY OF COLORADO BOULDER

FIELD RESEARCH INTERN | 05/2017 – 08/2017 | BOULDER, CO

- Assisted in tree canopy and forest health assessments for a Ph.D. geography research project.
- Measured tree height, diameter at breast height (DBH), and analyzed canopy photos for LAI (Leaf Area Index).
- Used ArcGIS to map ecological study sites and track environmental changes.
- Conducted an original research study on vegetation succession and presented findings at an academic conference.
